Are you an experienced DevOps/release engineer who wants to lead technical development efforts?
This opportunity on our Application Solutions team will put you in charge of driving the contin

In collaboration with other Application Solutions team members, as well as IT Governance, Risk

Key responsibilities

- Implementing and maintaining a release pipeline ecosystem with stability, consistency, responsiveness
- Managing releases to a three-tiered environment: development, testing, and production
- Monitoring performance and providing continuous feedback to the Development team
- Collaborating across Development, Software Quality Assurance, and Operations teams to define and improve release processes
- Developing and maintaining fully automated builds/continuous integration of both custom and third-party applications
- Continuously improving the reliability and performance of test and build processes
- Maintaining the source code repositories; assisting in refining and building development workflows
- Ensuring the release pipeline complies with applicable standards and is auditable
- Presenting accurate deployment effort estimates and providing timely updates
- Working with teams to improve scalability and supportability of products
- Staying current with new release technologies, policies, processes, and practices and being proactively involved in their development
- Working with Development and Software Quality Assurance teams to integrate automated testing into the release pipeline
- Serving as the technical subject matter expert on releases
- Documenting process, platform, and workflow details including high- and low-level designs of the release pipeline
- Troubleshooting issues identified during the delivery of new or existing systems and resolving them
- Engaging in on-call support as needed

Core strengths

- 3+ years of technical experience with the software development lifecycle in an agile (Scrum) environment
- 3+ years of experience with C#, .NET Core, MSBuild, PowerShell, and Visual Studio
- 4+ years of hands-on experience with source code, build, and continuous integration-related tools
- ITIL Foundation certification
- Bachelors degree in computer science or a closely related field (or equivalent work experience)
- Strong troubleshooting, debugging, and analytical skills
- Experience releasing to a cloud environment such as AWS or Azure and/or cloud-based release management tools
- Experience with change management a plus
- Experience with Microsoft SharePoint and ServiceNow a plus
- Strong attention to detail and an ability to manage and keep track of multiple tasks simultaneously
- Strong communication and interpersonal skills; ability to introduce and explain complex technical concepts

Have we piqued your curiosity? Can you see yourself thriving in this opportunity? Let's introduce you to the team.

Job Title: Software Engineer- Dev Ops

Location: Cambridge, MA

Date: May 2

Link: <https://boston.craigslist.org/gbs/sof/d/cambridge-software-engineer-dev-ops/6879668728.h>

compensation: TBD

employment type: full-time

Job Description:

QR Code Link to This Post

Clinical Research IO (CRIO) is a fast-moving start-up company in Kendall Square working to transform clinical research. Even in an age of smart-phones, most clinical research today is hand-written on paper and stored in a filing cabinet.

As a Software Engineer in our Dev Ops department, you will be responsible for:

- Managing our infrastructure, both cloud, and in-house
- Developing internal applications for customer support, sales, marketing and system administration
- Developing APIs, integrating with external vendors, and migrating/managing data
- Perform quality assurance manually or through automation (unit test, scripts, etc)
- Ensure our systems are secure and meet regulatory requirements

Requirements:

- Attention to detail
- Java, Linux and MySQL experience
- Github, Selenium, Unit Testing Frameworks and Jenkins experience preferable

You'll be working hard for sure, but you'll also learn a tremendous amount and get to experience a fast-paced environment.

If you consider yourself in the top 1%, then please send your resume and why you think you would be a great fit.

Learn more about our company at www.clinicalresearch.io. To apply for this position, please send your resume to hr@clinicalresearch.io.

Job Title: Lead Full Stack Developer - Travel App

Location: N/A

Date: May 1

Link: <https://boston.craigslist.org/gbs/sof/d/boston-lead-full-stack-developer-travel/687930961.h>

compensation: Equity

employment type: full-time

Job Description:

QR Code Link to This Post

Do you love to travel? We're a startup with a big vision to transform the way people plan travel.

Work directly with the startup founder and UX designer to walk through the process of fully developing a travel app.

From you:

- You will play an integral role in application development and creative problem solving
- Ability to help us build a modern technical stack and make any 3rd party integrations recommended
- Experience with Javascript, and common libraries
- Amazing front-end implementation skills using CSS
- Experience with Web Apps
- Able to take role in testing to troubleshoot bugs across browsers and devices
- Willingness to adopt agile mindset and to prioritize to get to MVP launch
- Experience working with an agile design team using Sketch app
- Plus if you've developed scalable, user-friendly front-end services, on social platform before

From us:

- We'd love to see demos of your technical skills and interests in any recent project URLs, GitHub, etc.
- We'd love to tell you more about our exciting and disruptive project with a big vision to transform travel.
- We'll ask that you sign a non-disclosure and confidentiality agreement for the project.

Students and experienced folks making a career change are welcome. The project should be near-term.

Excellent opportunity for someone who wants to create and be part of a game-changing project in the travel industry.

We look forward to hearing from you!

If you're interested in applying for the role, you can check it out here:

<https://www.hireart.com/jobs/122f7259/apply>

HireArt is looking to hire a Vehicle Operator to work at Toyota Research Institutes (TRI) Cambridge.

Maintain Toyota's high standard of safety, inside and outside of the vehicles.

Consistently demonstrate situational awareness, an understanding of the technology in your car.

Conduct a variety of critical data collection for engineering teams using complex proprietary software.

Be an ambassador for the technology by communicating expertly and courteously at all times with customers.

Travel outside of the primary location of hire, with occasional extended travel periods of time.

If you're interested in applying for the role, you can check it out here:

<https://www.hireart.com/jobs/122f7259/apply>

Requirements

Bachelors degree or equivalent experience

Valid US driver's license, a clean driving record, and 7+ years of driving experience

Able to demonstrate safe driving in all weather conditions, including snow

Good mechanical aptitude, basic mechanical skills and general knowledge of operating hand tools

Excellent verbal and written communication skills

Proficient computer skills, including basic troubleshooting with the ability to utilize proprietary software

Type 50+ words per minute

Ability to learn quickly and implement new concepts

Working Conditions: Due to the nature of the position and daily inspections of the vehicle, there will be some travel required.

If you're interested in applying for the role, you can check it out here:
<https://www.hireart.com/jobs/122f7259/apply>

Are you an experienced DevOps/release engineer who wants to lead technical development efforts?

This opportunity on our Application Solutions team will put you in charge of driving the contin

In collaboration with other Application Solutions team members, as well as IT Governance, Risk

Key responsibilities

Implementing and maintaining a release pipeline ecosystem with stability, consistency, responsiveness
Managing releases to a three-tiered environment: development, testing, and production
Monitoring performance and providing continuous feedback to the Development team
Collaborating across Development, Software Quality Assurance, and Operations teams to define and improve processes
Developing and maintaining fully automated builds/continuous integration of both custom and third-party components
Continuously improving the reliability and performance of test and build processes
Maintaining the source code repositories; assisting in refining and building development workflows
Ensuring the release pipeline complies with applicable standards and is auditable
Presenting accurate deployment effort estimates and providing timely updates
Working with teams to improve scalability and supportability of products
Staying current with new release technologies, policies, processes, and practices and being proactively involved in their development
Working with Development and Software Quality Assurance teams to integrate automated testing into the release pipeline
Serving as the technical subject matter expert on releases
Documenting process, platform, and workflow details including high- and low-level designs of tools and processes
Troubleshooting issues identified during the delivery of new or existing systems and resolving them
Engaging in on-call support as needed

Core strengths

3+ years of technical experience with the software development lifecycle in an agile (Scrum) environment
3+ years of experience with C#, .NET Core, MSBuild, PowerShell, and Visual Studio
4+ years of hands-on experience with source code, build, and continuous integration-related tools and processes
ITIL Foundation certification
Bachelors degree in computer science or a closely related field (or equivalent work experience)
Strong troubleshooting, debugging, and analytical skills
Experience releasing to a cloud environment such as AWS or Azure and/or cloud-based release management tools
Experience with change management a plus
Experience with Microsoft SharePoint and ServiceNow a plus
Strong attention to detail and an ability to manage and keep track of multiple tasks simultaneously
Strong communication and interpersonal skills; ability to introduce and explain complex technical concepts to non-technical audiences

Have we piqued your curiosity? Can you see yourself thriving in this opportunity? Let's introduce you to the team.

compensation: TBD

employment type: full-time

Job Description:

QR Code Link to This Post

Apprentice Entrepreneur

If you are passionate about entrepreneurship, always wanted to start your own company but don't know how, this is your chance.

This position is not the typical corporate ladder type job. It is NOT a stepping stone to graduate school or a job at a top tech company.

Requirements:

- Recent graduate who has excelled in life (went to a top-tier school, did something unique and challenging, etc.)
- Attention to detail to the point of being anal. What was spelled wrong here? Did that bother you?
- Can't stand being part of the machine... you want to build the machine.
- Hungry to succeed and willing to go all-in to make it happen!
- Genius software developer who wants to learn the business side. However, if you are smart, you can learn.
- Willing to work for \$40k for the first year, scale to \$100k+ within 12-18 months, and hopefully more.

The ideal candidate must be an entrepreneur at heart and have had dreams of running their own company.

You'll be working hard for sure, but you'll also learn a tremendous amount and get to experience the rewards of entrepreneurship.

To apply for this position, please send a cover letter and resume to: jobs@massrealty.com

Job Title: Junior UX and Visual Designer

Location: Cambridge

Date: May 2

employment type: full-time

Job Description:

QR Code Link to This Post

Clinical Research IO (CRIIO) is a fast-moving start-up company in Kendall Square working to transform the way we think about clinical research. We're looking for a creative Junior UX designer to help support and drive our mission-critical projects.

Required Skills & Experience

- Have the mindset of a UX Designer
- Experience with UX Design: wireframing, theming, prototyping, etc.
- Experience with UI Design: branding, layouts, mockups, etc.
- Articulate in communicating complex ideas and concepts
- Ability to work well with development team and other designers
- Insatiable appetite to consume latest trends in Mobile and Web experiences

Desired Skills & Experience

- Experience prototyping in Axure
- Product design through storyboarding and concept sketches
- Proficient with Adobe Creative Suite
- Working knowledge of HTML, CSS and JavaScript

You will receive the following benefits:

- Medical Insurance
- Vision
- Flexible spending accounts
- Employee assistance program
- Free lunches most days of the week
- Monthly team events
- Fun office environment
- Paid vacation
- Paid company holidays

To apply for this position, please send a cover letter and resume to: jobs@clinicalresearch.io

Job Title: Software Engineer- Dev Ops

Location: Cambridge, MA

Date: May 2

Link: <https://boston.craigslist.org/gbs/sof/d/cambridge-software-engineer-dev-ops/6879668728.h>

compensation: TBD

employment type: full-time

Job Description:

QR Code Link to This Post

Clinical Research IO (CRIIO) is a fast-moving start-up company in Kendall Square working to transform clinical research. Even in an age of smart-phones, most clinical research today is hand-written on paper and stored in a filing cabinet.

As a Software Engineer in our Dev Ops department, you will be responsible for:

- Managing our infrastructure, both cloud, and in-house
- Developing internal applications for customer support, sales, marketing and system administration
- Developing APIs, integrating with external vendors, and migrating/managing data
- Perform quality assurance manually or through automation (unit test, scripts, etc)
- Ensure our systems are secure and meet regulatory requirements

Requirements:

- Attention to detail
- Java, Linux and MySQL experience
- Github, Selenium, Unit Testing Frameworks and Jenkins experience preferable

You'll be working hard for sure, but you'll also learn a tremendous amount and get to experience a lot of new things.

If you consider yourself in the top 1%, then please send your resume and why you think you would be a great fit.

Learn more about our company at www.clinicalresearch.io. To apply for this position, please send your resume to hr@clinicalresearch.io.

Job Title: Lead Full Stack Developer - Travel App

Location: N/A

Date: May 1

Link: <https://boston.craigslist.org/gbs/sof/d/boston-lead-full-stack-developer-travel/687930961.h>

compensation: Equity

employment type: full-time

Job Description:

QR Code Link to This Post

Do you love to travel? We're a startup with a big vision to transform the way people plan travel.

Work directly with the startup founder and UX designer to walk through the process of fully developing the app.

From you:

- You will play an integral role in application development and creative problem solving
- Ability to help us build a modern technical stack and make any 3rd party integrations recommended
- Experience with Javascript, and common libraries
- Amazing front-end implementation skills using CSS
- Experience with Web Apps
- Able to take role in testing to troubleshoot bugs across browsers and devices
- Willingness to adopt agile mindset and to prioritize to get to MVP launch
- Experience working with an agile design team using Sketch app
- Plus if you've developed scalable, user-friendly front-end services, on social platform before

From us:

- We'd love to see demos of your technical skills and interests in any recent project URLs, GitHub, etc.
- We'd love to tell you more about our exciting and disruptive project with a big vision to transform travel.
- We'll ask that you sign a non-disclosure and confidentiality agreement for the project.

Students and experienced folks making a career change are welcome. The project should be near-term.

Excellent opportunity for someone who wants to create and be part of a game-changing project in travel.

We look forward to hearing from you!
